

A photograph of two aerial silk dancers in a blue-tinted sky. The dancers are silhouetted against the bright sky, with their arms raised and holding onto the silk. The silk is draped around them, creating a sense of movement and grace. The overall mood is serene and ethereal.

OXYONTM

NEGATIVE ION

DESLEEMATTEX

OXYON™

NEGATIVE ION

Oxyon offers mattress fabrics treated with negative ions. Negative ions are odorless, tasteless and invisible molecules that we inhale when close to natural environments like waterfalls, oceans and mountains. Once they reach our bloodstream, negative ions are believed to produce biochemical reactions that increase the level of the mood-affecting chemical serotonin, which helps to alleviate depression, relieve stress, and boost our daytime energy.

Our current urban lifestyle exposes the human body to harmful positive ions generated from electronic and electrical equipment (like mobile phones and computers), chemicals, acid rain and ultraviolet rays. Negatively charged ions are believed to help blood purification and balance the negative ions within the body.

BALANCE YOUR BODY

Negative ions in the body are formulated to increase the body's metabolism process in its efficiency. Conversely, too many positive ions in the body makes the metabolism work less efficient and slower. While a body with more positive ions is believed to lead to a feeling of fatigue and discomfort, the balance in positive and negative ions is formulated to release positive vibes and energy.

There is something in the air.
Boost your mood.
